Story

Elias, our CEO, took the train to Vietnam and back in 2019, traveling through 13 countries.

"I got to know the beautiful sides of train travelling:

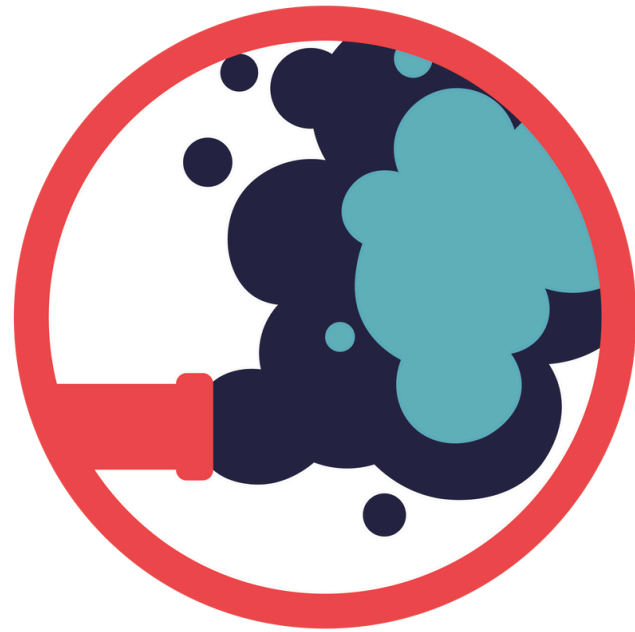

1. Travelling by train is climate-friendly
 2. The journey is the destination. You experience a variety of cities, people, cultures, languages, landscapes, art, animals, food, etc.
 3. Many things are possible by train, especially within Europe. From Vienna you can reach over 20 countries in less than 24 hours. The ONLY problem is: nobody knows how EASY it is!
 4. Traveling by train covers all the needs of traveling: seeing many countries and cities, beautiful landscapes, having lots of relaxation and time for yourself, having cool experiences, and finally... having time to finally read a book.
 5. The soul has time to come along.
 6. local value creation
 7. you pay taxes (unlike international flights)
- That's why I founded Traivelling."

Elias Bohun – CEO Traivelling, Forbes 30 under30 award winner

Traivelling has won several awards for its work: Greenstar 2020, VCÖ Mobility Award, Magenta TUN 2022, Heute for Future 2022 etc.
100+ newspaper articles, TV, radio, podcasts have reported on Traivelling.

potential impact

traivelling

High carbon emissions of
the EU-28

Airplanes emit 14 times
more CO₂ than trains*.

Complex booking
process

for long-distance travel
by train

Lack of awareness

to use more sustainable
solutions for long-
distance travel

* source: ecopassenger.hafas.de (train route: Vienna–Zürich–Geneva–Lyon–Barcelona) flight Emission multiplied with RFI – factor (describes higher warming effect from flight emissions in high altitudes)
emissions Vienna–Barcelona: 287,1 kg CO₂* by plane / 20,3 kg CO₂* by train
